ORLOV CONSTRUCTION
ROOFING & CLADDING SPECIALISTS

CAPABILITY STATEMENT 2026

ONE FIRM FOR THE WHOLE BUILDING ENVELOPE

Roofs, walls, SFS and fire stopping, designed in-house, supplied direct from the manufacturers and installed by experienced installers, for main contractors.

Newport Leisure & Wellbeing Centre: triangular aluminium cassette façade, design, supply and fit

Since 2017	Winchester	£250k–£3M	Design · supply · fit
ESTABLISHED	BASED · WORKING NATIONWIDE	PACKAGE SIZE	ONE PACKAGE

WHAT WE DELIVER

SYSTEMS WE DESIGN AND INSTALL

ROOFING

- Euroclad Vieo and Euroseam standing seam
- Built-up and composite roofs (Euroclad Elite, Kingspan)
- Sika Sarnafil single ply and bitumen warm roofs
- Tata Steel structural roof decks, roof windows

CLADDING

- Aluminium rainscreen, including feature cassettes
- NBK terracotta and Eurobond insulated panels
- Rockpanel, Equitone and Cedral fibre-cement
- Natural slate (CupaClad), timber and composite

FRAMING, FIRE & DETAILS

- Metsec SFS framing and sheathing
- Cavity barriers and fire stopping (Siderise, Tenmat, Rockwool)
- PPC aluminium flashings, fascias, copings and rainwater goods

HOW WE WORK

FROM MODEL TO HANDOVER

Design & technical
Packages modelled in 3D in Autodesk Revit and shared in IFC. Junctions, corners and interfaces solved in the model, not on site. U-values, condensation risk and fixings checked with the manufacturers. We take design responsibility for our packages.

Supply
Bought direct from the system manufacturers, with every order planned back from your programme and lead times, and each delivery checked in on site.

Installation & safety
Every operative signed in fit for work each morning, weekly toolbox talks, permits for hot works and work at height, and daily MEWP checks.

Fire safety & quality
ISO 9001 quality management. Cavity barriers and every area photographed and checked before close-up, with the record handed over for the building's safety file.

One point of contact
From tender to final account, with daily photo progress reports and dayworks sheets signed on site.

WHY MAIN CONTRACTORS USE US

LESS RISK AT EVERY JUNCTION

One envelope, one designer
Roof, walls, SFS and cavity barriers under one design and one warranty: no gaps between trades at the roof-to-wall junction.

Complex façades
Feature aluminium cassettes, glazed terracotta, standing seam and slate on public buildings, delivered to programme.

Evidence, not promises
Photo records of fire stopping and every hidden layer, ready for Building Safety Act information.
